- o   Integrated payment gateways and other essential e-commerce functionalities.
- o   Conducted thorough testing to ensure a bug-free user experience.

Self Employed Freelancer   **2022 - present**

 Full stack developer and Graphic Designer

- o   Successfully completed various web development projects using technologies such as React, Next.js, and python, django, Mongodb, PostgreSQL, Docker, Amazon web services (AWS).
- o   Designed visually appealing and effective graphics for clients using Photoshop and Coreldraw.
- o   Demonstrated strong time management and communication skills while working independently on multiple projects simultaneously.

Projects

- o   **GadgetApp : React, TypeScript**
  I developed GadgetApp, an e-commerce / gadget showcase application using React, TypeScript, and MongoDB. This project enables users to browse, filter, and purchase gadgets, with real-time updates on stock and product availability. My responsibilities included designing the frontend UI/UX, implementing secure backend APIs for product data, user authentication, and order processing, and optimizing database queries and server performance. Demo

- o   **Real Estate Frontend Website**
  Built a responsive and dynamic real estate web application using React, TypeScript, Tailwind CSS, and Vite. Designed an intuitive interface that allows users to browse,

search, and filter property listings seamlessly. Focused on delivering a clean, modern UI with optimized performance and smooth user interactions across all devices. [Demo](#)

- o **Coffee store website**

  A coffee website app to explore blends, cafés, brewing essentials, subscriptions, and place online orders. Features secure checkout, reviews, rewards, café locator, personalized suggestions, and mobile-friendly design. [Demo](#)

- o **Real Estate Backend App**

  Created a backend system for listing, filtering, and managing properties.

  Implemented secure login, CRUD functionality, and PostgreSQL integration. [GitHub](#)

- o **E-Commerce Backend App**

  Developed API endpoints for product listing, shopping cart, orders, and payments.

  Applied JWT authentication and role-based access control for users and admins. [GitHub](#)

Education

OBAFEMI AWOLOWO UNIVERSITY	**2019**

Completed Bachelor of science (B.SC) in Microbiology

Ecole supreruier de management Benin, Cotonou	**2024**

Completed Bachelor of science(B.sc) in Computer science

NYSC – Completed my National Youth Service Corp in April 2022.

Achievements & Awards

FreeCodeCamp Certification in JavaScript Algorithms and Data Structures

FreeCodeCamp Certification in Frontend Frameworks: React Redux

Torilo Academy Software Development Certification
